SCAN FOR PORTFOLIO

## CAREER OBJECTIVE

Computer Science student with a strong foundation in Data Science & Data Structure and Algorithm with Hands-on experience using Python for data analysis, preprocessing, and model development. Built end-to-end data-driven projects involving databases and predictive solutions, with a strong interest in applying AI to real-world problems.

## TECHNICAL SKILLS

| | | |
|---|---|---|
| **Programming Languages** | : | Python, SQL |
| **Data Analysis** | : | Pandas, NumPy, Data Cleaning, EDA, Statistical Analysis, Feature Engineering |
| **Data Visualization** | : | Power BI, Matplotlib, Seaborn, Data Visualization, Data Interpretation |
| **Machine Learning** | : | Scikit-learn, Predictive Modeling, Model Training & Validation, Performance Evaluation |
| **Database** | : | MySQL |
| **Tools and Platforms** | : | Google Colab, Jupyter Notebook, Git, GitHub, Hugging Face, Vercel |
| **Deployment and APIs** | : | Flask API |

## PROJECTS

### Ninaivugal AI - AI photo organizer

- Developed a CNN-based image organization system that analyzes user-uploaded photos, learns visual patterns from a sample dataset, and compares new images with existing images to identify similarities.
- Automated photo management by storing similar images in their corresponding folders and creating new folders for previously unseen images, enabling a simple and organized way to manage growing image collections.

### SyncPulse AI

- Built an AI/NLP pipeline to analyze employee journal text and identify meaningful patterns related to emotional fatigue, anxiety, mood changes, and workplace burnout using neural-network-based classification.
- Combined NLP insights with workload and behavioral metrics to support wellness scoring and risk analysis, helping the platform provide more personalized and data-driven well-being insights.

### Spotify UI/UX Recreation - Figma

- Recreated Spotify's user interface in Figma, focusing on visual accuracy, layout, typography, colors, and component consistency.
- Designed interactive user flows and prototypes to replicate the core music browsing and navigation experience.
- Strengthened practical skills in UI/UX design, prototyping, visual hierarchy, and design systems.

## INTERNSHIPS

**AI/NLP Model Developer Intern | ICONIC HUB [ Remote ]** **(July 2026 - Oct 2026)**

- Worked on text-processing and NLP classification components that analyzed employee journal data to identify patterns associated with fatigue, anxiety, and workplace burnout.
- Contributed to tuning neural-network-based NLP models and integrating their scoring outputs with backend services as part of the end-to-end SyncPulse AI workflow.

**UI / UX Intern | NSIC [ Offline ]** **(Jan 2025 - Feb 2025)**

- Recreated Spotify's UI/UX design in Figma, focusing on layout, typography, colors, and components.
- Built interactive prototypes to replicate core navigation and user flows.

## EDUCATION

**B.E - Computer Science & Engineering (CSE)** **2023 - 2027**
Dhaanish Ahmed College of Engineeirng , Chennai

**Higher Secondary (XII)** **2022 - 2023**
Don Bosco Higher Secondary School, Chennai
